# Bose SoundComm™ B30 Headset

Professional audio for critical communication environments

## EXPERIENCE IT

The SoundComm™ B30 Headset with active noise cancellation represents a breakthrough to the broadcast, live event, and sports intercom markets, where noise is pervasive and communication and comfort are critical. It is engineered for significantly improved comfort, clear audio, and increased noise reduction compared to conventional passive headsets. We encourage you to experience the difference Bose technology makes in high-noise communication environments.

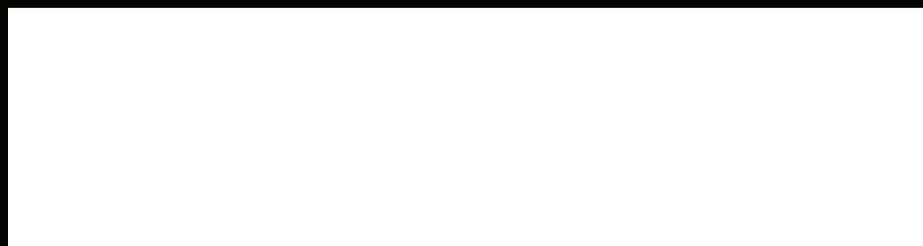

**The SoundComm™ B30 Headset provides professional audio, enhanced communication and comfort for users of typical broadcast, live event and sports intercom systems.**

- Acoustic Noise Cancelling® technology provides increased attenuation of low-frequency noise.
- Durable and robust design made to endure the wear and tear of everyday use, and the temperature and environmental extremes in outdoor environments.
- Noise cancelling microphone for clear transmissions.
- Engineered and built with Bose proprietary Acoustic Noise Cancelling technologies.
- Bypass communications mode provides audio with or without battery power.
- Single earcup and dual earcup headsets available.
- Compatible with multiple intercom systems.
- The Bose SoundComm™ B30 is the official headset of the NFL.
