

# Cinegel Sampler Filter Kit

An all-purpose collection of the most popular, Academy Award® winning Cinegel materials for photographers and filmmakers. The kit contains one piece each of 15 different light-control materials, which offer complete control over all aspects of the light in the shot.

- Color corrections that balance the various light sources in the shot.
- Diffusion materials for softening and shaping the beam, and controlling shadows.
- Roscoflex reflector to bounce warmed light into the shot.
- Color effects filters for adding dramatic, vibrant color.
