SCAFF DECK

The Innovators

SIXTY82 Scaff Deck

Built Tough. Engineered to Last.

Meet the **SIXTY82 Scaff Deck** – a real step forward for scaffolding platforms. Engineered specifically for the demands of the rental & event industry. This durable deck offers extra stability, a balanced weight, and a practical design for easy handling. It integrates seamlessly with the most well-known scaffolding systems and, with optional leg pockets, can function independently as a self-supporting stage element. Built to withstand heavy and repetitive use, the **SIXTY82 Scaff Deck** guarantees reliable performance every time.

KEY FEATURES

- **15 mm Plywood Decking:** More rigid and stable than traditional 12 mm decks.
- **Dark Brown Hexa Non-Slip Surface:** Secure grip, even when conditions aren't perfect.
- **Fully Welded Aluminium Frame:** Robust, welded corners for added stiffness.
- **Double middle beam:** Strongly reduces bounciness of the deck compared to single beam decks.
- **Plywood Glued to Frame:** Extra stability, less twist and flex.
- **Heavy-Duty Aluminium Corner Connections:** Built to last through continuous use.
- **Easy grip Profile:** Easier handling, quicker setup.
- **Optional Leg Pockets:** Compatible with 48.3 mm single-leg setups for flexibility.
- **Sizes for Every System:** Available in both 2072 scaff and metric formats.
- **Easy System Integration:** Fits smoothly with popular scaffolding stage systems using the SIXTY82 Scaff Beam.
- **Stage82 Ecosystem:** All accessories for the standard Stage82 elements also fit the scaff deck.

Product	Code	Weight
