

# LENS TUBES

## PLT SERIES FIXED LENS TUBES

Designed specifically for LED sources, Strand PLT Series fixed lens tubes offer high output and excellent imaging quality thanks to the latest in optical design. The PLT Series includes a range of angle options from a very narrow 5° to super-wide 70°. The PLT lens tubes provide a quick connection to the shutter gate using the unique Quick Change tool-free slot-and-lock attachment system. With strong features and a range of options, the PLT Series offers great value for the price.

## SPX SERIES FIXED LENS TUBES

Designed for high quality gobo projection, the legendary Strand SPX Series lens tube system is suitable for both LED and Tungsten light source applications. The lens tubes feature the Quick Change tool-free slot-and-lock attachment system and a no light leak gel house that maximizes airflow to help improve gel life when using gels with LED or incandescent light sources.

## SPX ZOOM SERIES LENS TUBES

Compatible with both LED and incandescent light sources, the SPX Zoom Series lens tubes are the benchmark zoom lens tube for the entire industry. Featuring the Quick Change tool-free slot-and-lock attachment system, to date they are still the only lens tube that can be interchanged with a fixed lens without the complicated removal of a gate system. SPX Zoom Series lens tubes come in two useful zoom ranges: the 25-50° for wider angle application and the 15-35° for more general application. Like the SPX Series fixed lenses, the SPX Zoom Series lenses also include a no light leak gel house that maximizes airflow to help improve gel life.

## LENS TUBE ADAPTERS

Giving life to your old lens tube, we offer two lens tube adaptor options which are compatible with legacy Strand lens tubes as well as other common industry lens tubes.

Note: Although we offer a lens tube adapter, we do not guarantee the quality or performance of other manufacturers' lens tubes when using with Strand profile light engines
